

MANUFACTURER'S INFORMATION SHEET
Sunglasses for general use**These sunglasses comply with Regulation (EU) 2016/425 and EN ISO 12312-1: 2013 / A1: 2015****Intended use**

These sunglasses protect against damage to the eyes due to exposure to sunlight.

Limitations of use

This product is:

- not for direct observation of the sun or for viewing of solar eclipses.
- not for protection against artificial light sources (e.g. solaria).
- not for use as eye protection against mechanical impact hazard, during which the sunglasses could break, causing injury to the face and eyes.
- not suitable for driving at night or in conditions of poor visibility.

Sensitivity to light and glare, especially in very bright conditions such as on snowfields, at the beach or at sea, varies from one person to another but it must be considered that the lightest filters, categories 0 and 1, reduce solar radiation only slightly in the visual field whilst guaranteeing excellent protection in the UV area.

Storage

When not in use store these sunglasses in their case at a temperature between -10°C and +35°C.

Avoid exposure to sunlight in closed spaces without conditioning (e.g. car dashboard), as high temperatures may affect the functionality of the glasses.

Replace the sun filters if damaged (e.g. scratched, opaque). Use only original accessories and spare parts.

Cleaning

Use a damp cloth and mild detergent to clean the glasses and dry with a soft, clean cloth. Do not use solvents (e.g. alcohol, acetone) or aggressive cleaning chemicals which could affect the functionality of the glasses.

Marking

MARKINGS AND ACCESSORIES: The model identification mark is on the inside of the temple. Lens category specified on the back of the information sheet.

The UV protection category of your eyewear is described below with reference to the table on this leaflet (*):

0 Very limited reduction of glare

1 Limited reduction of glare

2 Good protection against glare

3 High protection against glare

4 Very high protection against intense and extreme glare, e.g. from sea and snow, or in the mountains or desert. Not suitable for driving and use on the road.

This information sheet is drawn up in compliance with Annex II, par. 1.4 of of Regulation (EU) 2016/425
